

# Would Simply Safe Connect™ give you time back?

We are a WA-built, WA-hired team designing one connected system for incidents, observations, handovers, parent sign-offs, ratios, allergies and compliance — so educators spend less time on admin and more time with children. Before we build another line of code, we want to hear from you.

## MY VOLUNTARY STATEMENT

*As an early childhood educator, I believe a calm, connected system that drafts observations, links EYLF & NQS, manages incidents, ratios and parent sign-offs in one place — without surveilling children — would give me meaningful time back with the children in my care, and raise the standard of safety they deserve.*

*This is not a contract or commitment. It is feedback to help WA-built software meet WA educators where we actually work.*
